

Miller Dune

Saturday November 3, 2012

10:00 a.m. to 3:00 p.m.

Volunteer Workday
Savanna Restoration

Miller Dune is in desperate need of savanna restoration. Historically this site was much different from current conditions. Wildfires would burn periodically thru these high dune habitats allowing only fire-adapted species to thrive. In the absence of periodic fires, the herbaceous plant community, as well as, the tree canopy density has drastically changed. On this workday we will be using chainsaws, brush cutters and loppers to thin the tree canopy and allow more sunlight to reach the forest floor. Lunch will be provided. Please **RSVP** volunteer@heinzetrust.org if you wish to participate, so we can plan accordingly.

Directions to site: From US HWY 12 take Lake St. North to Hemlock Ave. Turn right (east) on Hemlock to Grand Blvd. Turn left (north) on Grand to 1st intersection at Forest Ave. Turn left (east) on Forest and continue to Rush St. We will meet at the intersection of Forest and Rush.
